

4. TOOL HOLDERS

4.4 For internal threads: Tap holders with 4-jaw square chuck

Without quick change system

AKON tap holders center the tap exactly in the provided drill-hole. A finely aligned positioning results in a perfectly straight thread. No more poor finish or defective threads. Cut your threads in an uncomplicated way, fast and with high quality.

A lathe mandrel is to be ordered together with the tap holder.

Part No.	Größe	Dimensions (mm)		Thread size to be cut ISO metric coarse thread size - DIN 13
		d1	square	
100106	1	12	2.1 - 4.9	M1 - M6
